---

## SKILLS

---

- Develop mobile application and web application in hantek digital consult. Located at fadayi bustop ikorodu road street. This application helps a client to order products online which could be delivered to the client by the distributor closer to that location. Before advancement for ordering, the client must register online by placing his/her details and location so as to get the distributor close to the location. Rendering the presentation of the app to clients was also my technical resource field, to explain more on the application and the circle it revolves, reviewing to them on the uses of the application. I was also developing a solution on an advancement to MAY & BAKERS site before leaving.

- Creating and integrating frontend View that REST API can connect endpoints for other applications like desktop, mobile and web to consume over http protocols.
